Hazard statement

H226 Flammable liquid and vapour.
H315 Causes skin irritation.
H317 May cause an allergic skin reaction.
H319 Causes serious eye irritation.
H335 May cause respiratory irritation.
H336 May cause drowsiness or dizziness.
H341 Suspected of causing genetic defects.

H351 Suspected of causing cancer.

H360 May damage fertility or the unborn child.
H370 Causes damage to organs (respiratory organ).

H371 May cause damage to organs (central nervous system, kidney, liver).

H372 Causes damage to organs (Bone, central nervous system) through prolonged or repeated

exposure.

H373 May cause damage to organs (nervous system, respiratory organ) through prolonged or repeated

exposure.

H400 Very toxic to aquatic life.

H410 Very toxic to aquatic life with long lasting effects.

Precautionary statement

Prevention

P201 Obtain special instructions before use.

P202 Do not handle until all safety precautions have been read and understood.

P210 Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.

P233 Keep container tightly closed.

P240 Ground and bond container and receiving equipment.
P241 Use explosion-proof electrical/ventilating/lighting equipment.

P242 Use non-sparking tools.

P243 Take action to prevent static discharges.

P260 Do not breathe mist/vapours.

P264 Wash hands thoroughly after handling.

P270 Do not eat, drink or smoke when using this product. P271 Use only outdoors or in a well-ventilated area.

P272 Contaminated work clothing should not be allowed out of the workplace.

P273 Avoid release to the environment.

P280 Wear protective gloves/protective clothing/eye protection/face protection.

Response

P303 + P361 + P353 IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water.

P304 + P340 IF INHALED: Remove person to fresh air and keep comfortable for breathing.

P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present

and easy to do. Continue rinsing.

P308 + P311 IF exposed or concerned: Call a POISON CENTRE/doctor.
P333 + P313 If skin irritation or rash occurs: Get medical advice/attention.
P337 + P313 If eye irritation persists: Get medical advice/attention.
P362 + P364 Take off contaminated clothing and wash it before reuse.
P370 + P378 In case of fire: Use appropriate media to extinguish.

P391 Collect spillage.

Storage

P235 Keep cool.

P403 + P233 Store in a well-ventilated place. Keep container tightly closed.

P405 Store locked up.

Disposal

P501 Dispose of contents/container in accordance with local/regional/national/international regulations.

Other hazards which do not

result in classification

None known.

Supplemental information None.

3. Composition/information on ingredients

Components	CAS#	Percent	
Fluoro resin	Trade Secret	40	
aromatic hydrocarbon mixture	64742-94-5	>33	

Components	CAS#	Percent
Cyclohexanone	108-94-1	12
1,2,3-trimethylbenzene	526-73-8	<4
1,2,4-Trimethyl benzene	95-63-6	<1
Ethylbenzene	100-41-4	<5
Xylene	1330-20-7	<5

4. First aid measures

First aid procedures

Inhalation Remove victim to fresh air and keep at rest in a position comfortable for breathing.

If a worker inhales steam or gas and feels unwell, move to a location with fresh air, rest in a

posture that facilitates breathing, and contact a doctor.

If breathing weakly or have stopped breathing, loosen your clothes and give artificial respiration. In

some cases, administer oxygen and seek medical attention immediately.

Skin Take off immediately all contaminated clothing.

Wash off with soap and water. Get medical advice/attention if you feel unwell.

Wipe up with absorbent material (e.g. cloth, fleece).

Thoroughly flush with plenty of water and soap or skin cleanser.

Do not use solvents and thinner for wipe up.

Get medical attention if changes in appearance or pain occur.

Get medical attention immediately. Eye

Immediately wash with plenty of clean running water for at least 15 minutes. Remove contact

lenses, if present and easy to do. Wash thoroughly to the back of the eyelids.

Never give anything by mouth to a victim who is unconscious or is having convulsions. Ingestion

Do not induce vomiting without advice from poison control center.

If vomiting occurs, keep head low so that stomach content doesn't get into the lungs.

If swallowed, keep warm and rest, seek medical attention immediately.

Do not swallow vomit.

If conscious, drink 1 to 2 glasses of water.

Most important symptoms and effects, both acute and delayed Not available.

Notes to physician

Not available.

5. Fire-fighting measures

Suitable extinguishing media

Foam. Dry chemical powder. Dry sand. Carbon dioxide (CO2).

Unsuitable extinguishing media

Do not use water jet as an extinguisher, as this will spread the fire.

Specific hazards arising from

Hazardous decomposition products formed under fire conditions.

the chemical

When pyrolyzed by fire, highly toxic gases such as hydrogen fluoride are generated.

Self-contained breathing apparatus and full protective clothing must be worn in case of fire.

Protective equipment and precautions for firefighters **Protection of fire-fighters**

If danger can be avoided, stop supplying the combustion source. Fight fire from upwind area.

Remove flammable materials from the environment Specific methods

Use designated extinguishing media.

Cool closed containers exposed to high temperatures with water.

Material name: LUMIFLON LF552E

SDS GHS UN 3 / 11

871 Version #: 02 Revision date: 03-February-2021 Issue date: 16-December-2020

6. Accidental release measures

Personal precautions

Keep unnecessary personnel away.

Keep people away from and upwind of spill/leak.

Eliminate all ignition sources (no smoking, flares, sparks, or flames in immediate area).

Avoid breathing mist/vapours.

Do not touch damaged containers or spilled material unless wearing appropriate protective

clothing.

Ventilate closed spaces before entering them.

Wear appropriate protective equipment (gloves, protective mask, apron, goggles, boots, etc.)

when working.

Prepare a suitable fire extinguisher in case of ignition.

Quickly remove nearby ignition sources, hot bodies, and nearby combustibles.

Environmental precautions

Do not discharge to rivers. Be careful not to cause environmental impact

Methods for containment

Eliminate all ignition sources (no smoking, flares, sparks, or flames in immediate area). Keep combustibles (wood, paper, oil etc) away from spilled material. Take precautionary measures against static discharge. Use only non-sparking tools. Stop the flow of material, if this is without risk. Prevent entry into waterways, sewer, basements or confined areas.

Methods for cleaning up

Ventilate the contaminated area. Wear appropriate protective equipment and clothing during clean-up. This product is miscible in water. Prevent product from entering drains. Do not allow material to contaminate ground water system.

Large Spills: Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Use a non-combustible material like vermiculite, sand or earth to soak up the product and place into a container for later disposal. Following product recovery, flush area with water.

Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination.

Never return spills to original containers for re-use. For waste disposal, see section 13 of the SDS.

7. Handling and storage

Handling

Obtain special instructions before use.

Do not handle until all safety precautions have been read and understood.

Do not handle, store or open near an open flame, sources of heat or sources of ignition. Protect

material from direct sunlight.

Explosion-proof general and local exhaust ventilation.

Take precautionary measures against static discharges.

All equipment used when handling the product must be grounded.

Use non-sparking tools and explosion-proof equipment.

Do not breathe mist/vapours.

Avoid contact with eyes, skin, and clothing.

Avoid prolonged exposure.

When using, do not eat, drink or smoke.

Pregnant or breastfeeding women must not handle this product.

Should be handled in closed systems, if possible. Wear appropriate personal protective equipment.

Wash hands thoroughly after handling. Avoid release to the environment.

Observe good industrial hygiene practices.

Storage

Store locked up.

Keep away from heat, sparks and open flame.

Prevent electrostatic charge build-up by using common bonding and grounding techniques.

Store in a cool, dry place out of direct sunlight.

Store in tightly closed container. Store in a well-ventilated place.

Store away from incompatible materials (see Section 10 of the SDS).

8. Exposure controls / personal protection

Control parameters

aromatic hydrocarbon mixture (CAS 64742-94-5)

Cyclohexanone (CAS 108-94-1)

Danger of cutaneous absorption

Danger of cutaneous absorption

Recommended monitoring

procedures
Engineering controls

Follow standard monitoring procedures.

Install an exhaust system so that steam does not stay.

Attach emergency shower and eye washing equipment to work area and clearly display its position. In case of indoor work, use auto application equipment or local ventilation equipment to prevent a worker from directly being exposed.

worker from directly being expose

in case of working at closed place such as inner of tank, install ventilation equipment to ventilate

up to the bottom of closed place.

The equipment shall be made with corrosion resistant material.

Make sure that workers do not directly touch or expose corrosive substances.

Do not place high temperature or ignition source close to working place with this product.

Use explosion-proof handling equipment

Personal protective equipment

Eye/face protection

Wear safety glasses with side shields (or goggles).

Skin protection Wear appropriate chemical resistant clothing.

Use of an impervious apron is recommended.

Wear long-sleeved work clothes, apron, arm covers, and gloves (wear clothing that does not touch

the skin)

Respiratory protection In case of insufficient ventilation, wear suitable respiratory equipment. Chemical respirator with

organic vapour cartridge.

Wear air-supplied respirator in closed areas.

Wear an air supply.

Hand protection Wear protective gloves. Wear gloves that are impervious to organic solvents or chemicals. Wear

oil-resistant protective gloves.

Decomposition temperature Not available.

Viscosity Not available.

Density 1.04 - 1.08 g/cm3 (25°C)

10. Stability and reactivity

Chemical stability Stable at normal temperature and pressure.

Possibility of hazardous

reactions

Reacts with nitric acid and strong oxidants, causing fire and explosion hazard. [Cyclohexane]

Vapours may form explosive mixture with air.

May ignite on contact with high surface temperature, sparks or open flame.

Conditions to avoid Avoid heat, sparks, open flames and other ignition sources.

Avoid temperatures exceeding the flash point.

Contact with incompatible materials.

Incompatible materials Strong oxidising agents. Halogens. Concentrated sulfuric acid Concentrated nitric

acid Molten sulfur

Hazardous decomposition

products

Hydrogen chloride. Hydrogen fluoride (HF) and carbonyl fluoride (COF 2).

Mobility Not available.

13. Disposal considerations

Disposal methods Collect and reclaim or dispose in sealed containers at licensed waste disposal site.

Material name: LUMIFLON LF552E

Waste from residues / unused products

The remaining products (residual waste) should be discarded according to the law concerning waste disposal and cleaning and the prefectural / municipal regulations.

Do not flush wastewater cleaned in containers, equipment, etc. to the ground or drain. Waste generated by wastewater treatment, incineration, etc. shall be processed or consigned according to Waste Management and Public Cleansing Act. and the related laws.

When performing consignment processing, contract with a specialized industrial waste disposer

authorized by the prefectural governor.

Since waste generates hydrogen chloride and hydrogen fluoride when incinerated, it is incinerated in an incinerator equipped with neutralization facility and, the incinerated residue is land filled in legally right place. Do not incinerate in the case of exceeding fluorine emission standards.

This product including aromatic hydrocarbon mixture is applied to specially controlled industry waste.

Contaminated packaging

Dispose of the waste under a contract with a licensed industrial waste disposal contractor.
